

Laundrywala-We minimize your hassle

We are all busy with our works. Sometime we don't have enough time to do extra works like washing our cloths or iron them. Basically the app will find nearby laundries and based on the review the customer will request Wash/Iron of clothes. If the shop approves a delivery man (works) for the app (like foodpanda) will go to the customer's house and pick the cloths. If the shop finishes the task the customer will recieve a notification through the app and will have both option of receving the goods by themself or a delivery person.

Describe four specific functions that your app will do. List these ideas in order of importance, with the first idea being the most important.

Find Nearby Laundry

Request for Laundry Service

Be a delivery man

List your Laundry in the app

Students (Living away from family)

Office Employee

Older Persons

Foreigners

**Office employees generally stays busy at office work whole day speically those who have a hectic schedule.The won't have enough energy/time to do extra works at home. So Office employees can be a potential user.

Make Money

Minimize Hassle

Creates job opportunity

Save time/energy

Laundrapp - Laundrapp is basically british startup company started their journey on 2014. They have their own machines, factory, trucks etc. They collect clothes from customers home and deliver it after service. Laundrapp have both website and mobile app.

Cleanly - Cleanly is US based app only available for iOS. They ask customer to create a schedule and leave their clothes outside house. Cleanly then pick the clothes and after service they deliver the clothes.

Rinse - Rinse is quite similar to Cleanly also available only in some states of US. They have some specified routes as they are available in very few locations. They ask customer how they want their items to be washed. Like Detergents / Fabric Softener and based on the answers they provide services.
